

## Lebensmittelrechtliche Konformitätserklärung

**Für unseren Artikel:**

**Vakuumbbeutel 250x300mm**

**mit der folgenden Artikel-Nummer:**

**6525303**

Hiermit bestätigen wir auf der Grundlage der uns vorliegenden Lebensmittelunbedenklichkeitserklärung des Produzenten, dass die von uns oben genannten Artikel für den Kontakt mit Lebensmitteln geeignet sind und den dafür vorgesehenen Gesetzen sowie Richtlinien entsprechen.

Zum eigenen Schutz unserer Lieferquellen sind Vorlieferant und Untersuchungslabor sowie dritte beteiligte Personen unkenntlich gemacht. Die uns vorliegende Originalerklärung kann den zuständigen Behörden auf Verlangen zur Verfügung gestellt werden.

Unsere Bestätigung setzt voraus, dass der Packstoff sachgemäß weiterverarbeitet wird. Die spezielle Eignung dieses Packstoffes kann nur vom sachkundigen Füllguterzeuger oder Abpacker beurteilt werden.

Diese Konformitätserklärung ersetzt zuvor ausgestellte Konformitätserklärungen und besitzt eine allgemeine Gültigkeit ab Ausstellungsdatum bis zum 04.03.2027 bzw. bis zur Änderung der Gesetzeslage.

### DECLARATION OF COMPLIANCE

Issuer's name, address:	██████████ ██
Date:	2025.03.04
This declaration is valid until:	2027.03.04
Object of declaration:	<b>Vacuum bag</b>
Raw materials, goods and substances:	For the production of Vacuum bags the PA/PE film is used: 20% - Polyamide (PA) 80% - Polyethylene (PE) – is in direct contact with food. Vacuum bag film contains a unique additive - metallocene polyethylene mPE. With this addition vacuum bags are sealed even under difficult conditions in the presence of salt, vinegar or fat.
Marking of packages:	

**Packaging suitability description:** Vacuum bags are intended for direct contact with aqueous, acidic, fatty, room and lower temperature foods. May come into contact with food on its entire surface.

#### Conditions of use:

- The person or company responsible for packing of the product must determine the suitability of the packaging for the type of food/non-food product intended to pack. The following must be taken into account: storage time under normal or appropriate temperature conditions;
- Bags are tested according (EU) No. 10/2011, Table 3 - OM2 conditions.  
*Intended food contact conditions: All storage times at refrigerated and frozen conditions including hot-fill conditions and/or heating up to  $70\text{ °C} \leq T \leq 100\text{ °C}$  for maximum  $t = 120/2^{(T-70)/10}$  minutes.*  
The contact time between the product and the packaging at temperatures above  $70\text{ °C}$  can not exceed 2 hours. Maximal temperature is  $100\text{ °C}$  and can not exceed 15min. ( $70\text{ °C}$  up to 2h and  $100\text{ °C}$  up to 15min)
- At room temperature and below ( $+20\text{ °C}$  to  $-18\text{ °C}$ ) the duration of contact of the product with the packaging corresponds to the shelf life of the product;
- The surface of the packaging in contact with food does not exceed  $6\text{ dm}^2 / \text{kg}$  of food.

#### Migration limits

The total level of substances migrating from polymeric materials and articles to food shall not exceed  $10\text{ mg} / \text{dm}^2$  or  $60\text{ mg/kg}$ .

Overall and specific migration tests were done in accordance with Commission Regulation (EC) No. 10/2011.

According to the information provided by the raw material suppliers before the date of this declaration of conformity, and according to test results made in an accredited laboratory, concentration level of heavy metals present in packaging (updated with directive 2005/20/EC) Lead, Mercury, Chrome Hexavalent are not internationally added to the films. Films have a total heavy metal content, due to incidental sum of concentration, lower than 100ppm.

According to the information provided by the raw material suppliers before the date of this declaration of conformity, the raw materials used to manufacture the packaging may include:

- Substances for which a specific migration limit (SML) is established. For these substances the SML will not be exceeded even to a maximum film thickness of 160 µm (assuming that 1 kg of food is packaged with 6 dm<sup>2</sup> of film):

Reference No.	CAS No.	SML (mg/kg)
18820	0000592-41-6	3
14200, 4180	0000105-60-2	15 (T)
22660	0000111-66-0	15
19960	0000108-31-6	30 (T)
68320	0002082-79-3	6

- Dual use additives (approved as food additives): Silicon dioxide

### **ORGANOLEPTIC PROPERTIES:**

Based on the information received from the raw material suppliers, laboratory analysis, as well as the physical analysis of the product during production, we confirm that the packaging meets the requirements of taste and smell. The packaging does not endanger human health, has no unacceptable properties that would alter the composition of the food or impair the organoleptic properties of the packaged product.

**Functional barrier data do not apply to this film.**

**The object of the declaration described meets the requirements of the following documents:**

- Commission regulation (EU) No 10/2011 of 14 January 2011 „on plastic materials and articles intended to come into contact with food“ provisions, including the latest amendments that entered into force before the date of issue of this document.;
- Regulation (EC) No 1935/2004 of the European Parliament and of the Council of 27 October 2004 „on materials and articles intended to come into contact with food and repealing directives 80/590/EEC and 89/109/EEC“ provisions, including the latest amendments that entered into force before the date of issue of this document.;
- Commission regulation (EC) No 2023/2006 of 22 December 2006 „on good manufacturing practice for materials and articles intended to come into contact with food“ provisions, including the latest amendments that entered into force before the date of issue of this document.;
- Commission regulation (EC) No 1895/2005 of 18 November 2005 „on the restriction of use of certain epoxy derivatives in materials and articles intended to come into contact with food“;
- The packaging conforms to the relevant requirements of Directive 94/62 / EC on packaging and packaging waste and assigned harmonized standards of the European Standard (EN) 13427-13432. including the latest amendments that entered into force before the date of issue of this document.;

- Law on Packaging and Packaging Waste Management of the Republic of Lithuania, 2001 September 25 No. IX-517 Vilnius.
- Lithuanian hygiene Norm HN 16:2011 of 8 May 2011 on materials and articles intended to come into contact with food, special health requirements for safety.;
- Manufacturer [REDACTED] has been audited according FSSC 22000, ISO 9001:2015, ISO 14001:2015 and complies with above mentioned standard.

This declaration of conformity refers only to Vacuum bags produced by [REDACTED] and does not include any modifications as the result of the further processing of the product (printing etc.)
